

Confirm Your Math Placement

BCOE strongly encourages all incoming first-year students to take the Mathematics Advisory Exam (MAE) regardless of your expected AP results.

The MAE is an online placement test to place first year students into an appropriate entry-level Mathematics course. Taking the MAE provides BCOE with the necessary placement information to create your Fall 2022 schedule, especially if your AP exam scores arrive after your Highlander Orientation session. It is also possible your exam score will not impact your Fall 2022 schedule. For example, a score of 2 on the AP Calculus BC exam will not help you with math placement.

Here is the webpage with more information on the Mathematics Advisory Exam:

<https://arc.ucr.edu/mae>

You do not have to take the MAE if you earned one of the following exam scores:

Exam	Score(s)	Math Placement
Advanced Placement (AP) Calculus (AB) Exam	2	MATH 005
Advanced Placement (AP) Calculus (AB) Exam	3, 4, 5	MATH 009B
Advanced Placement (AP) Calculus (BC) Exam	3	MATH 009C
Advanced Placement (AP) Calculus (BC) Exam	4, 5	Confirm Your Fall 2022 Schedule
International Baccalaureate (IB) Mathematics Exam	5, 6, 7	MATH 009B

BCOE will honor the highest placement results. If you receive your test scores after your orientation session and those scores impact your Fall 2022 schedule, please let us know and we can help you adjust your schedule. The instructions for email advising are at the top of this webpage.

If you have transferable college credit at the Pre-Calculus (Math 5 at UCR) level or higher from an accredited institution of higher education, please visit assist.org to verify how your Mathematics course transfers to UCR from a California Community College. You should also make sure to submit an official transcript with this college credit to Admissions.

[https://admissions.ucr.edu/myucr#where do i send my transcriptsdocuments](https://admissions.ucr.edu/myucr#where%20do%20i%20send%20my%20transcriptsdocuments)

Notes:

- Please make sure your AP scores are sent to UCR. Please visit <https://www.collegeboard.org/> for more information.
- Failure to confirm your math placement may prevent you from registering for a math course during your Orientation session.
- Students can only register for a math course with an MAE score, AP Calculus credit, IB Mathematics credit, or transferrable Math college credit.
- You will need documentation of this credit to register for the appropriate mathematics course.
